

Drum Coating Application System

Spray Control Benefits in Coating Application (1)

- Enhanced product by adding oils, flavors, and vitamins
- Maintain high productivity through automation
- Even coverage
- Minimal misting

Control Panel (2)

- AutoJet® Model 1750+
- Control automatic spray nozzles
- Set operating parameters
- Multiple timing modes for; fixed, variable, and repeat spray patterns
- Mounted on fluid delivery cart (optional)

Delivery Module (3)

- PulsaJet® automatic electric spray nozzle provides accurate, rapid and repeatable dose sizes
- Sanitary manifold with enclosed fluid and electrical lines (optional)

Pump Version (4)

- Durable, air operated diaphragm pump that requires liquid to be supplied by means of a tote or a tank
- Liquid regulator precisely controls pressure and reducing pulsations from the pump

Air Control Package (ACP) (5)

- Precision control of liquid pressure
- Regulated air supply to pump

AccuCoat® HD15 In-Line Heater (6)

- Temperature control (up to 130°F)
- Maintain consistent performance seasonally
- Improved spray performance
- Reduces viscosity
