

HOW TO QUICKLY FIND A PRODUCT AND PLACE AN ORDER

TO FIND A PRODUCT

BY APPLICATION

Refer to the Nozzle Application Guide on **page 4**.

The guide provides an overview of the most commonly-used nozzles in typical industrial applications.

BY PRODUCT NAME

Refer to the alphabetical Product Index beginning on **page Index 1**.

BY PART NUMBER

Refer to the numerical Part Number Index beginning on **page Index 8**.

TO PLACE AN ORDER

Ordering information is included for most products listed in the catalog. You will need to know the inlet connection size, nozzle type, material required and capacity size.

SAMPLE ORDERING INFO

STANDARD SPRAY NOZZLE				
1/4	G	-	SS	10
Inlet Conn.	Nozzle Type	Material Code	Capacity Size	

Capacity Size
Performance data shows capacity size options

Inlet Conn.

Nozzle inlet connection or flange size

Nozzle Type

Alpha or numeric nozzle designation

Material Code

Abbreviation for material of construction

Note: BSPT connections require the addition of a "B" prior to the nozzle body inlet connection.

ORDER ONLINE

Easily specify and order your nozzles online at www.spray.com/ispray.

ORDER BY CREDIT CARD

As a convenience to our customers, we accept Visa®, MasterCard®, Discover® and American Express® in addition to offering traditional invoicing methods.

MORE INFORMATION

Spraying Systems Co. has created an extensive resource library that is available to our customers both in print and online. Throughout this catalog you will see icons that direct you to places where additional spray performance data, application drawings and optimization tips can be found.
