

Chilled Glazing Spraying System On Cart

Fluid Supply System (1)

- Sanitary system (shown)
- Polished stainless steel 25-gallon (94-liters) tank
- Easy assembly and disassembly for clean up
- Manual pressure regulation
- Agitator for keeping fluid in suspension and chilling process

Auto-Refill Module (2) *Optional*

- Control box supplying air to transfer pump
- Level sensor for automated refill control
- Mounted on chilled glaze cart

Control Module (3)

- AutoJet® Model 1750+ (shown)
- Control automatic spray nozzles
- Set operating parameters
- Multiple timing modes for; fixed, variable, and repeat spray patterns

Zone Control Module (4) *Optional*

- Manual 8-Zone control box (shown)
- Individual PulaJet® activation
- Mounted on chilled glaze cart

Delivery Module (5)

- PulaJet® automatic electric spray nozzle provides accurate, rapid and repeatable dose sizes
- Variable mounting options with adjustable PulaJet® brackets
- Sanitary manifold with enclosed fluid and electrical lines (optional)

Power Supply Enclosure (6)

- Convenient power distribution for chiller pump, auto-refill box, and 1750+ controller.

Transfer Pump (7) *Optional*

- Air driven, sanitary design, 2:1 ratio piston pump, with air regulator (shown) | Threaded version (optional)
- Easily transfer low to medium viscosity liquids out of drums and totes

Liquid Chiller Pump/Tank Probe (8)

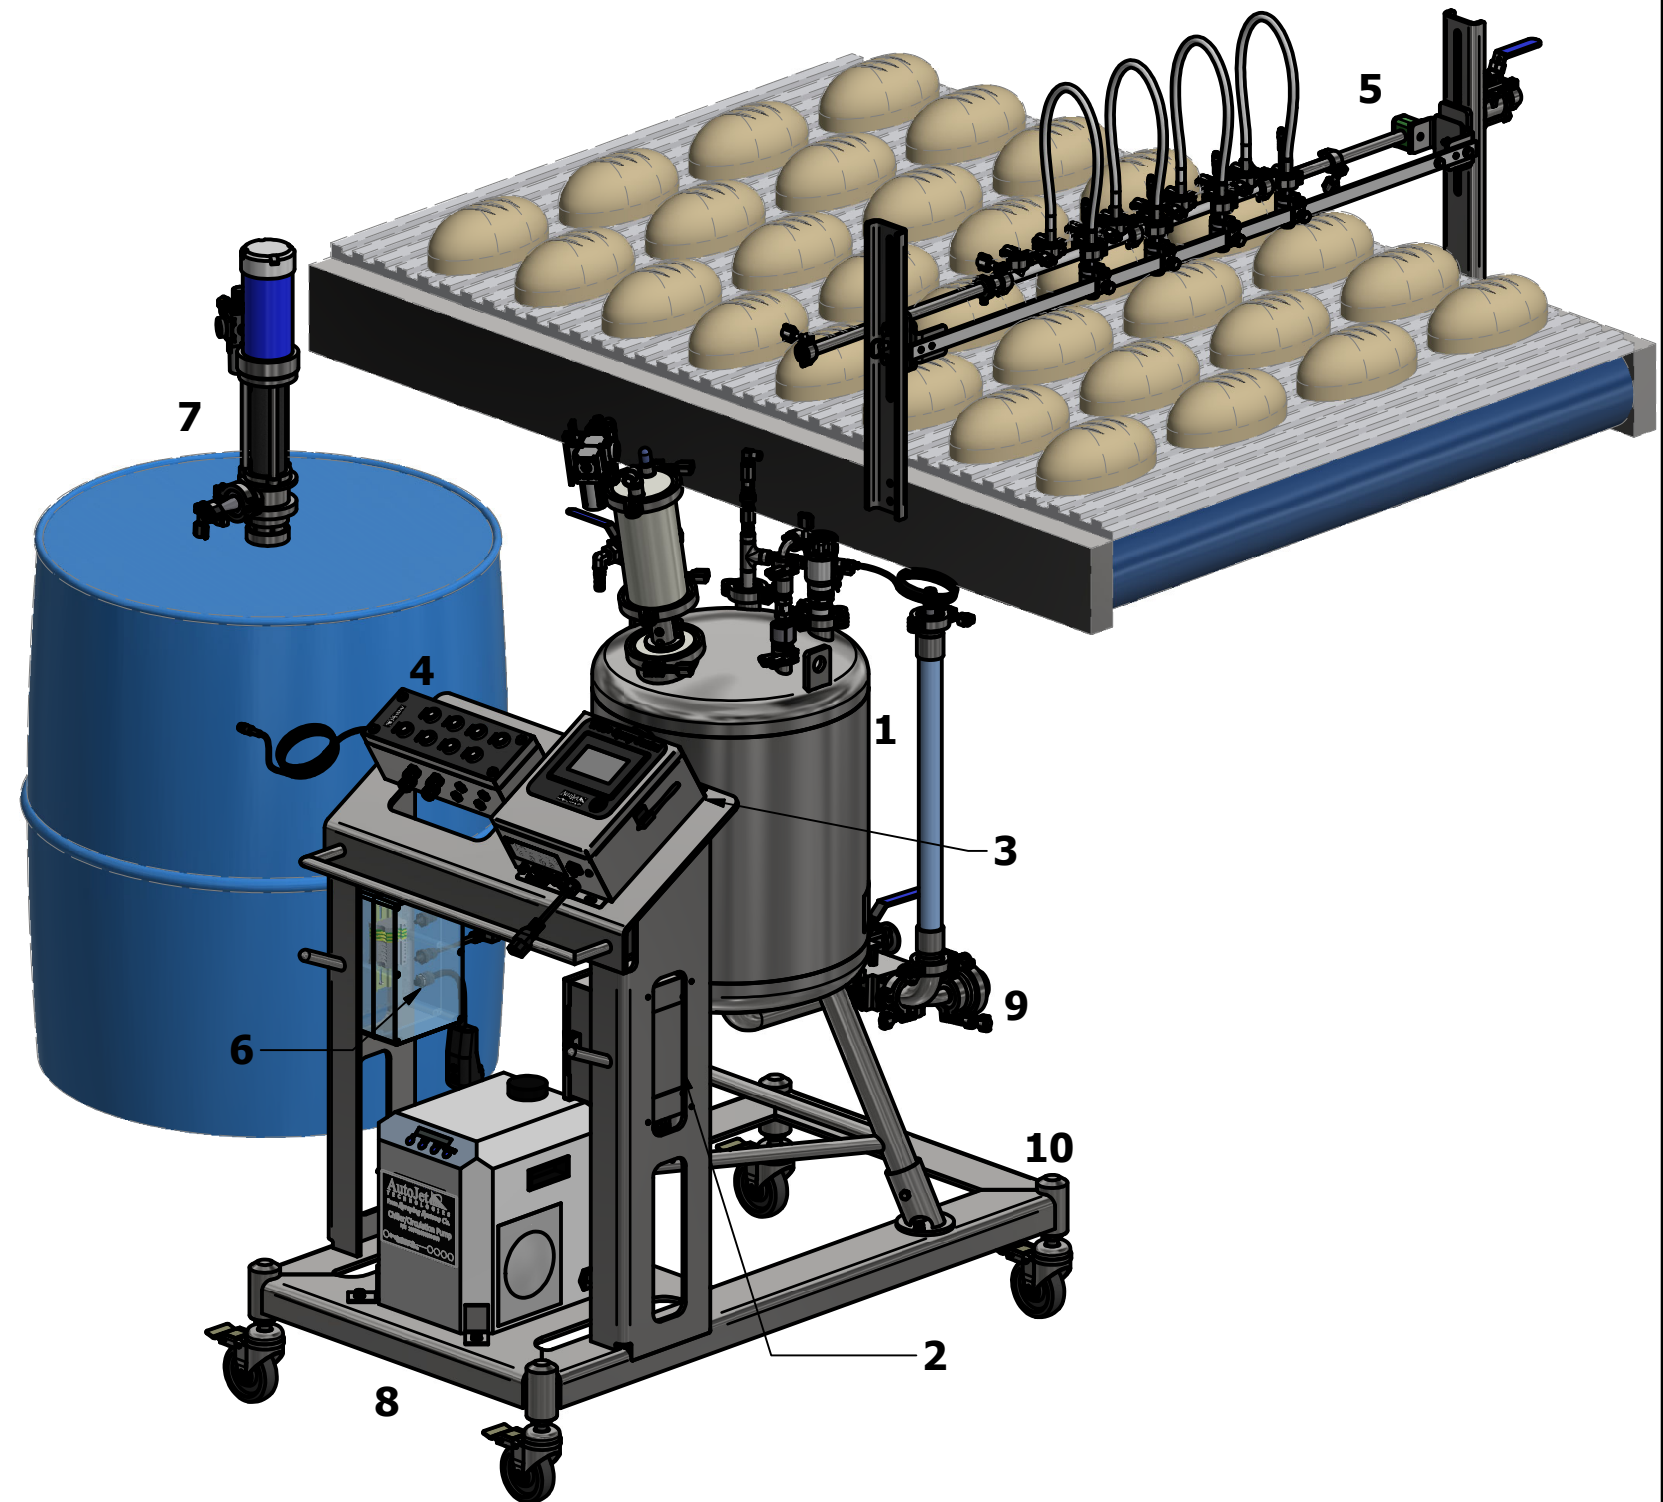

- Thermo-electric liquid chiller, built-in pump [Maintain 60°F Liquid temperature at 90°F max. ambient]
- Sanitary, immersion, chiller probe for tank

In-line Strainer (9) *Optional*

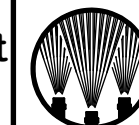

- Sanitary, in-line strainer to remove solid items from the liquid stream

Chilled Glaze Cart (10) *Optional*

- Most convenient option for system transfer and mounting of all components
- 49" x 30" foot print, minimizing occupied floor space
- Sanitary, wash-down panel design
